Villupuram, India

ABOUT ME

I'm a 3rd-year BCA student and a self-taught full stack web developer from Villupuram, India. I enjoy building things from scratch and solving real-world problems through code. I'm an active member of the VGLUG Foundation, a Linux enthusiast, and an open-source contributor. I'm always eager to learn, collaborate, and take on new challenges.

PROJECTS

UNIMART — Campus Marketplace

FastAPI · PostgreSQL · Redis · JavaScript · JWT · SMTP

github.com/numankhan2007/UNIMART

A full-stack, identity-verified campus marketplace where only registry-confirmed students can trade goods — eliminating fraud and scams prevalent on traditional platforms.

- Engineered a multi-step registration pipeline with CSV master-registry verification and SMTP-delivered OTP authentication
- Built a 4-stage order lifecycle (Pending → Confirmed → Completed/Cancelled) with OTP-based physical delivery verification
- Developed a Matrix-themed admin panel with dashboard analytics, user suspension, product moderation, and full audit logging with IP tracking
- Implemented JWT + refresh token auth, per-order real-time chat (auto-deleted 24h post-completion), and Redis-backed rate limiting

CareerOS — Career Management SaaS

FastAPI · PostgreSQL · JavaScript · JWT · Recharts

github.com/numankhan2007/CareerOS

A modern SaaS platform for students to discover, track, and manage internships & hackathons with analytics dashboards and AI-powered recommendations.

- Designed a 5-stage Kanban application tracker (Not Applied → Applied → Interview → Rejected → Selected) with inline status updates
- Built an interactive analytics dashboard with timeline charts, status distribution, and selection rate metrics using Recharts
- Implemented a tag-based recommendation engine that scores and ranks opportunities against the user's skill profile
- Architected secure httpOnly cookie sessions with JWT, bcrypt password hashing, and 401 auto-interceptor for token refresh

ShareNova — Digital Sharing Platform

JavaScript · Node.js · REST API

github.com/numankhan2007/ShareNova

A next-generation platform for secure, seamless transfer of files, media, and sensitive data across devices and users.

- Contributed to building secure file transfer modules supporting documents, videos, audio, and encrypted data payloads
- Collaborated on cross-platform sharing workflows with real-time transfer status and access control mechanisms

OPEN SOURCE & COMMUNITY

VGLUG Foundation — Active student member of the Villupuram GNU/Linux User Group, a FOSS community dedicated to promoting free and open-source software adoption. Participated in hands-on workshops, technical talks, and community-driven development sprints focused on Linux, open-source tools, and collaborative coding practices.

Hacktoberfest 2025 — Contributed to open-source repositories as part of DigitalOcean's annual Hacktoberfest initiative through the VGLUG Foundation. Submitted and got merged pull requests to community projects, gaining practical experience in collaborative version control, code review workflows, and upstream contribution etiquette.

EDUCATION

Bachelor of Computer Applications

Arignar Anna Govt. Arts College, Villupuram

2023 – 2026 · 3rd Year (Pursuing)

Higher Secondary (12th Grade)

Siga Higher Secondary School, Kappiyampuliyur

2022 – 2023 · 84.3%

Secondary School (11th Grade)

Siga Higher Secondary School, Kappiyampuliyur

2021 – 2022 · 76.67%

SSLC (10th Grade)

Evergreen English High School

Completed 2021 · 72.6%

SKILLS

Frontend:

HTML5, CSS3, JavaScript

Backend:

Python, FastAPI

Database:

PostgreSQL, Redis

Tools & Practices:

Git / GitHub, REST APIs, VS Code, Linux

CERTIFICATIONS

Full Stack Web Development

Professional Development Program

Enterprise Design Thinking Practitioner

IBM

Web Application Development

Naan Mudhalvan — Govt. of Tamil Nadu

Artificial Intelligence & Productivity Tools

Industry Skills Certification

Introduction to Software Development

Simplilearn SkillUp

LANGUAGES

Tamil

Native Speaker

English

Proficient

Urdu

Proficient

Hindi

Conversational
